## 2018

### PLATFORM 1 ART PROJECT - NOVEMBER

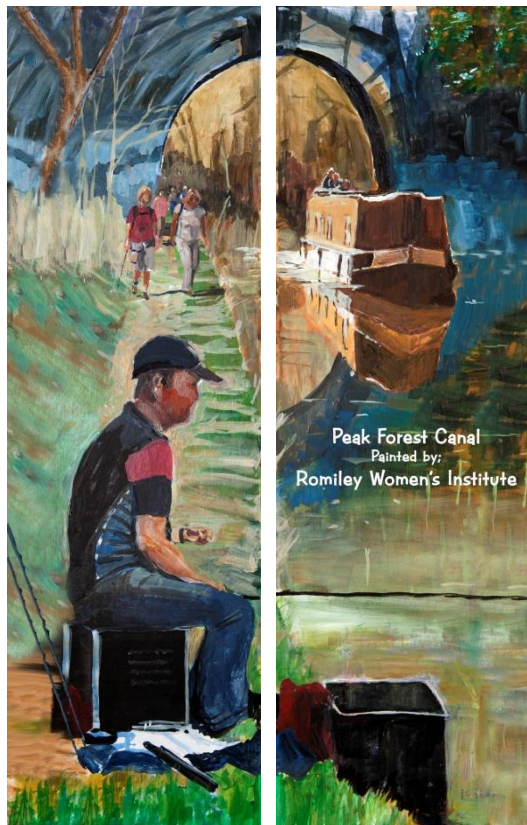

We are delighted to report that all the artwork has now been completed, photographed and formatted and is now with the printer. We will soon take delivery of the eleven aluminium panels.

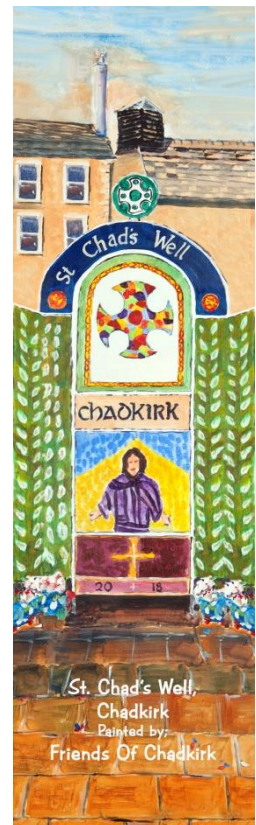

Hopefully, everything will be ready for actual installation towards the middle of November. After that we hope to organise a more formal unveiling ceremony followed by a bit of a bun fight on a Saturday morning in late November or early December.

Once we have a firm date we will send out invitations to everyone involved in the project so that they will have details of the unveiling.

Lord Stunell of Hazel Grove has very kindly agreed to carry out the formal part of the day.

As for the original artwork we hope to have each piece framed so that it can be presented to Manchester Airport for inclusion in a future exhibition.

## PLATFORM 1 ART PROJECT - OCTOBER

The final painting session took place during the Romiley Model Railway Show at Romiley Methodist Church on Saturday 8th September 2018.

We were delighted not only because yet more people from the area took part but by the fact that representatives of our principal financial supporters for the project (The Manchester Airport Community Trust Fund) came to the Show.

One of their Trustees John Taylor and Tina Large, their Community Relations Officer, did their bit adding to the scene of bowlers competing on the bowling green behind the Romiley Arms

Our supervising artist, Martin Goddard, is adding a few finishing touches before the final paintings are handed over to Anne Bennison to be digitally photographed. The photographs will then be sent off to our printer so as to produce the finished article prior to installation at the station.

## PLATFORM 1 ART PROJECT - SEPTEMBER

Only one more painting session to go now and then we should be in a position to have everything photographed prior to the actual artwork that will cover the windows being manufactured.

As mentioned in last month's supplemental newsletter the final session will take place during the Romiley Model Railway Show which takes place at Romiley Methodist Church on Saturday 8th September 2018.

## PLATFORM 1 ART PROJECT - AUGUST

It has now been agreed that final painting session will take place during the Romiley Model Railway Show which takes place at Romiley Methodist Church from 10am on Saturday 8th September 2018.

So not only can the local community take part in the session but they can also enjoy a great day out at what has become a popular and regular event in Romiley under the auspices of the Romiley Railway Modellers.

In the main newsletter we included some photos of the painting session that took place at the Romiley Market in Forum Precinct. Since then we have some more photos from the day to share with you.

The painting session on 4th August at the Romiley Market in Forum Precinct was a great success. Thanks to those of you who were able to come along at some time during the day.

## PLATFORM 1 ART PROJECT - JULY

A further session of painting took place in Chadkirk Chapel on Saturday 16th June.

There will be another session at the August Romiley Market from 10am on Saturday 4th August in the Forum Precinct. Do come along if you want to get painting.

The final session will take place at a meeting of the Romiley Railway Modellers

## PLATFORM 1 ART PROJECT - JUNE

The art project, aimed at transforming platform 1, is now well under way. Having secured £2,500 in grants our retained artist Martin Goddard has already overseen the painting of 5 of the required 11 panels. The painting itself having been undertaken by local community groups (Romiley WI and the St. Chad's Oasis Group). We have now obtained the services of Anne Bennison Photography to do all the photographic work.

The next session of painting will take place during the Friends of Chadkirk Plant Sale afternoon on Saturday 16th June (2.30pm until 4pm) so feel free to pop down for the afternoon. Refreshments (as well as plants) will be on sale.

Further community groups will then complete the work over the next few months so that hopefully everything will be in place at the station before the end of November.
