B: System Proposal

First and foremost, we would like to thank you for giving IBG the opportunity to tender this project.

This proposal is based on a site survey carried out by me, the conversations held on-site and our experiences in similar projects.

The system is set out to provide a high performing HD IP CCTV System, providing coverage of the outdoor classroom.

C: System Functionality

The system has been designed to provide coverage of the outdoor classroom, with constant recording with a minimum 21 constant recording loop with push notifications to a mobile device of choice.

D: Systems to be installed

CCTV System

The following description is our recommendations for the installation of a CCTV system at the property and will provide a High-Definition images recording on a constant loop for 21 days.

Recommended System

- **Outdoor Classroom**

- 1No. Black 4MP CCTV Camera
 - Providing coverage within the classroom
 - To be installed in a vandal resistant cage
 - Analytically detection
 - Audible & visible strobe warning

- **Recording Equipment**

- 1No. 4 Channel Network Recording Device
 - Installation location to be confirmed at installation.
 - 1TB Storage
 - Expandable up-to 4 cameras
 - 21+ Days Recording
 - Mobile application with off-site notifications

- **Notes**

- The mobile application requires a minimum of 2MB upload speed on internet connection
- All cabling will be contained in stainless steel conduit to protection
