Spring Festival

Let's Fly

A kite making workshop. A family friendly event, in collaboration with local social enterprise Plastic Shed. We will be making diy-style kites using recycled plastic waste, once crafted, we'll be taking them for a first flight around the new park!

Nest

A ceramic and wood workshop. We propose creating a range of bird boxes (and other nature boxes), encouraging wildlife and biodiversity within Stockport town centre. These boxes will be constructed from shingle style components, crafted during community workshops, inviting the public to create their own bespoke shingle. In collaboration with the Cheshire Wildlife Trust.

From The Ground Up

A ceramic tile making workshop. A chance to get mucky with local clay (recycled from the development itself), and learn some unusual techniques to create beautiful decorative tiles. Once fired and glazed at the Merseyway Workshop, the tiles will return to the park and be used to embellish planters in the community garden.

Summer Festival
