Stockport Council - Corporate Leaders Team Reports Environmental Impact Assessment

The purpose of completing this section is to help identify, forecast and understand any environmental impacts/consequences of your proposal at an early stage so necessary mitigations can be considered. For construction projects full EIAs are required. Please see below the table for guidance on completion.

Criteria		Beneficial Impact		No	Adverse Impact			
		Extent	Teri SL/I		Impact	Extent	Term SL / RI	Cause & Mitigation
Nature loss of habitats & species, topography changes					x			
Water Potential for Pollution, flood, drainage, use		L	L/I					Schools will be prioritised based on issues that may close them or reduce the operating capacity. Schools with localised flooding issued will be prioritised on this basis.
Air Quality, emissions					х			
Transport Method, fuel type and use, staff travel, supplier miles		В	L/I					Strategy and plan seek to better provide for children within the locality they live, ultimately reducing the need for travel.
Local Resources Energy, materials, paper, electricity, buildings, local sourcing		L	L/I					One of the aims of the asset management plan is to tie in decarbonisation by both reducing embodied carbon in materials used but by building/retrofitting schools making them operate more efficiently.
Waste Increase, Disposal, Recycling, non reusable materials. Does it follow the waste hierarchy: reduce, re- use, recycle					x			
KEY								
Extent		Term						
National N		nort S						
Regional R	Lo	ong L						
Borough B	Re Re	eversible R		R				
Local L	Local L Irre		eversible I					

Guidance on Completing the EIA Table:

Consider the likely impacts that your activity being reported on could have for each of the criteria. Using the key provided, complete each of the columns as required for beneficial, adverse or no impact outcomes. When doing this take account of the extent of the beneficial or adverse impacts – will it benefit or adversely affect only local areas (e.g. streets, post code areas, wards) or will it affect wider geographies? If there is an impact, will it be short term

(days, weeks or a month) or longer term (months, years, decades, etc.) and could the impact be reversed or mitigated? Use the final column to explain the causes and likely mitigation of impacts that could affect reversibility etc. Remember to capture beneficial impacts as well as negative ones since this can help clarify how adverse

Criteria	Searchable Terms					
Nature loss of habitats & species, topography changes	Natural capital; biodiversity net gain; planting native plants / trees; providing space and corridors for plants, insects and animals; pollinators; water features; tree shade; low maintenance native trees & shrubs.					
Water Potential for Pollution, flood, drainage, use	Water UK; permeable paving; sustainable drainage; water butts; water efficiency; greywater flushing; Refill.					
Air Quality, emissions	Air quality; clean air zones; public transport; active travel; planting to help air quality					
Transport Method, fuel type and use, staff travel, supplier miles	Traffic emissions; traffic congestion; accessible routes; sustainable transport; shared vehicles; virtual meetings; home working; electric vehicles; sustainable paving; travel plan; solar car ports					
Local Resources Energy, materials, paper, electricity, buildings, local sourcing	Green suppliers and technologies; renewable energy; energy efficiency; sustainable procurement; local economy; food miles; economies of scale; Social Enterprises; procurement policy					
Waste Increase, Disposal, Recycling, non reusable materials. Does it follow the waste hierarchy: reduce, re-use, recycle	Waste hierarchy; circular economy; sustainable procurement; recycled goods; Plastics Pact.					

impacts can be better avoided or managed.

If you feel that you don't have enough knowledge of the criteria to assess impacts to enable you to respond, then consider using an internet search engine to research the terms next to each criteria in the table below to find out more about possible impacts and benefits.

For general queries on environmental sustainability and assessment please contact Angie Jukes in the Planning Policy Team at <u>angie.jukes@stockport.gov.uk.</u>

Remember that the Council's Climate Action Now Strategy has the following aim:

'We will incorporate climate impact assessment into everything we do by incorporating it into decision making, report templates and all key strategies'
