

Stockport CAN Seed Fund Application

Application number 5b3369fb

Group name	Craig Road Residents Association
Group description	We have over 300 members in our association we have had a street party, Picnic in the park, a super hero day, where we brought the whole community together, we raised the funds for these events by taking football cards around the estate we also have raffles, so the community helps to pay for the free juice and snacks that we provide, we continue to raise money for future events so our community can get together and meet new friends and give the community something to look forward to
Funding requested	£660
Amount requested per ward	£660 from Heaton South
Proposal details	We would like to have another large raised wooden planter for in front of Craig road park in Heaton Norris SK42AP We have been quoted £960.00 for the planter of info@4seasonslawnandgardens.co.uk undefined:info@4seasonslawnandgardens.co.uk We have already received £300 from Stockport hydro towards the cost of the planter so we would like to apply for £660.00 so we can get the planer, the two we already have are very well maintained by the young and elderly residents and they look beautiful
How will proposal tackle climate change and / or increase biodiversity	The raised planters we already have are looked after by the young and elderly residents as they can be weeded easily as they are raised, some residents do not have gardens of their own so they look after the planters, the younger children love planting the flowers and seeing them grow, we would use the new planter to scatter wild flower seeds to help the birds and bees and wild life, the local residents and visitors to the area say how wonderful the planters look.
How many people will benefit from proposal	300
Who will benefit from proposal	The whole estate will benefit from having another planter as the ones we have encourage residents to look after them because they look beautiful and we are very proud of how they look with the beautiful flowers growing in them there is quite a lot of elderly residents who like sitting on the planters and weeding them, some meet up each week and have a chat while they do the weeding some of the local children have said they like the planters and scatter seeds and look forward to seeing them grow
