

Urgent Funding to Repair Stepping Hill Hospital and Provision of an Additional Town Centre Hospital Facility

This council meeting notes with great regret the poor condition of the building at Stepping Hill Hospital, which has led to incidents of collapsing roofs and the need to postpone or relocate various clinics and other hospital activities, causing inconvenience to staff and patients and reducing the hospital's ability to effectively serve local residents. These issues follow decades of insufficient funding to maintain the hospital's estate.

This council meeting further notes the need for additional healthcare capacity, particularly in the town centre, which would necessitate the construction of an additional hospital facility.

This council meeting therefore acknowledges the new Secretary of State's commitment to fund repairs at Stepping Hill Hospital. However, it stresses the cross-party consensus that exists about the urgent need to prioritise and expedite these improvements, as well as to address the wider healthcare capacity needs of the area.

This council meeting resolves to ask the Chief Executive to write to the Secretary of State for Health, asking him to:

- Agree to visit Stepping Hill Hospital and the proposed site for an additional hospital facility in the town centre, along with the three MPs covering our borough;
- Urgently fund the necessary repairs at Stepping Hill Hospital to restore the site to full capacity in a safe condition
- Consider funding the construction of an additional hospital facility in Stockport town centre to meet the healthcare capacity needs of local residents.
