#### Comments of the (Acting) Returning Officer

All rooms have disabled access and the review has taken into consideration that there should be no barriers to voting for people with a disability.

Several elections have been delivered on the above arrangements without issue. No superior alternative options have been identified at this time. As such no changes are proposed at this time.

### Comments of the (Acting) Returning Officer

All rooms have disabled access and the review has taken into consideration that there should be no barriers to voting for people with a disability.

There is no identifiable alternative that would be an improvement for electors in RN1 – RN7 and therefore no changes are proposed.

RN8 – This polling district was created at the 2022 Polling Place Review to allow for the Electoral Registration Officer to continue to produce electoral registers on the old ward boundaries, as was a legal requirement at that time. There is no longer such a requirement and therefore this district is superfluous, and it is proposed to rationalise the polling district scheme by merging RN8 into RN4. There would be noticeable change for the electors affected, who already vote at the polling station for RN4.

RN9 - This small polling district was created at the 2022 Polling Place Review to allow for the Electoral Registration Officer to continue to produce electoral registers on the old ward boundaries, as was a legal requirement at that time. There is no longer such a requirement and therefore this district is superfluous, and it is proposed to rationalise the polling district scheme by merging RN9 into RN4. There would be noticeable change for the electors affected, who already vote at the polling station for RN4.
